## WIDOS changes top management

Christian von der Linde takes over WIDOS management

The change management processes at WIDOS are well under way. Christian von der Linde, CEO, takes over the sole management of WIDOS from January 2019. WIDOS thanks the previous CEOs Juergen Dommer and Dr. Kai Dombrowski for their commitment and cooperation during the past years. Their insights established WIDOS as one of the world's leading manufacturer of plastic welding machines.

From March 2019, Christian Suhling will complement the WIDOS top management. Christian Suhling was CEO at PRETTL Automotive and responsible for various subsidiaries in North America. Christian Suhling is looking forward to bringing his international expertise to WIDOS and continuing the success of WIDOS, together with Christian von der Linde and the WIDOS employees.

Juergen Dommer will continue to advise the WIDOS group on selected topics, presumably until June, 30 2019. He will support the new CEO, especially on issues surrounding WIDOS' presence in North America and Asia.
